"Rational Ventilation of Stationary Working Places for Electric Welding," G. A. Iofinov, Ye. M. El'terman, Cands Tech Sci

Avtogen Delo, No 12, pp 18, 19

Assuming that conventional exhaust hoods do not satisfy conditions of electric welding operations, since they do not divert flow of heated contaminated air from vertical direction and remove air only after it passes through welder's

266T49

breathing zone, authors suggest ventilation system design in form of swinging double-sided panel. Drawing is given and performance discussed.
